

PRODUCT INFO

LSD - LIMITED SLIP DIFFERENTIAL ADDITIVE™

Product #93260

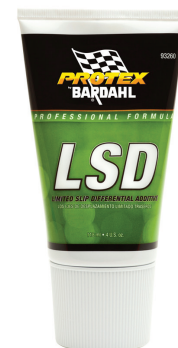

Synthetic Friction Modifier That Restores Normal Operation in Limited Slip Differentials

THE PROBLEM:

Over time many limited slip differentials develop clutch plate chatter due to degraded frictional properties of the differential fluid. Chattering often occurs when the vehicle is turning with the wheels revolving at different speeds and the clutch plates or disks are not sliding freely and causing improper operation.

THE SOLUTION:

PROTEX by BARDHAHL® Limited Slip Differential Additive™ is specially formulated with a synthetic friction modifier for use in limited slip rear axles. When added to the differential lubricant, it will modify the friction to reduce noise, vibration and clutch plate chatter.

THE BENEFITS:

- ⇒ Contains a synthetic friction modifier to reduce resistance and abrasion
- ⇒ Eliminates clutch plate chatter
- ⇒ Reduces noise and vibration
- ⇒ Compatible with all differential fluids, including mineral based and synthetic

DIRECTIONS:

Use to replace old fluid or add to the reservoir as needed to maintain correct fluid level. Top-up by adding the solution to the differential, but do not overfill. Drain and refill by removing the old fluid from the rear axle while the oil is warm. Add the solution to the differential and refill the axle to the proper level. Dispose of any used or unused solution and container in accordance with the local, state and federal regulations.

PRODUCT SPECIFICATIONS:

Product #	93260
UPC Code	0 76906 93260 8
Size	4 oz (118 ml)
Case Pack (Qty / Wt)	24 / 7 lbs
Case UPC	30076906932609
Color	Amber
Viscosity	6.0 cSt @ 100°C
Specific Gravity	0.90
